

Vicki Seifred

For the past two summers I have had the privilege of representing our state at the annual NEA

Representative

Seifred

Assembly. I would like to continue representing Delaware as we enter this time of uncertainty in public education. With my experience in turn-around schools, charter schools and high poverty schools, I believe this allows me the understanding of the issues that are being discussed at the national level. I wish to be part of this conversation.

It would be an honor to continue as your representative to the NEA RA. Thank you for your support.
