In the State of Delaware, if you take a six-hour Basic Defensive Driving course, you can knock 10% off your car insurance. If you take an Advanced Defensive Driving course you *may* save up to 15% off your car insurance.

You must attend the full six hours for the Basic course and the full three hours for the Advanced/Refresher course to receive your certificate. The Basic course is required first and is good for three years before it is necessary to take the Advanced/Refresher course. Each certificate is honored by your insurance company for 3 years.
